

TECHNICAL SHEET

ROUND DOWNSPOUT

DESCRIPTION

Round external downspout used to evacuate rainwater from the gutters.

This type of downspout was specially conceived to be installed with the European gutter.

The round downspout is manufactured in our factory. It is crimped continuously on the back (rear) and has three waves located on the exposed section of the downspout.

Diameter: 111 mm (4 3/8 in)

Length: 3048 mm (10'-0 in)

MATERIALS

The downspouts are made from the same material as the gutter :

- ◆ galvanized, Galvalume® or prepainted steel : 26 gauge
- ◆ copper : 16 oz or 20 oz.

HANGERS

- ◆ Standard : plain metal sheet of 25 mm (1 in) wide.
- ◆ Optional : decorative prefabricated hangers, on special order, to be validated with our Vaillancourt sales team.
